Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-24 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Pappas et al. (U.S. Patent No. 5,093,108) in view of Kallenbach (U.S. Patent No. 5,212,214).

Response to Arguments

Applicant's arguments filed 12/20/01 have been fully considered but they are not persuasive.

Applicant argues that Pappas ('108) does not teach an arylene sulfide polymer resin or microspheres. Pappas and Kallenbach ('214) teach the use of different chemical compounds to form different products via different methods for different purposes, one of ordinary skill in the art would not have been motivated to combine their teachings in the manner suggested by the examiner. Accordingly, one of ordinary skill in the art would not have had a reasonable expectation that this synergistic effect, which provides the "surprisingly hard, abrasion resistant, and durable coating, "would be observed if the components were added to Pappas compositions and were also not cured. The cited references fail to provide both a motivation to combine reference

teachings and a reasonable expectation of success for making the proposed combination.

In response to applicant's arguments, Pappas ('108) and Kallenbach ('214) are within the same field of endeavor, because the references teach coating a surface or a substrate. **In re Wood, 202 UPSQ 171 (CCPA 1979).**

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
